

Our Reserves

Durham Wildlife Trust exists to protect and enhance the natural environment and bring people closer to wildlife. Our Nature Reserves are critical to this, providing safe havens for wildlife, where people and nature can thrive.

This map details the spread of reserves. They vary in shape, size and speciality. Together with the Trust's advocacy work they help to create a wilder, more connected and biodiverse North East.

For full details of all of the Trust reserves including directions, suggested walks and what to look out for visit durhamwt.com/nature-reserves
