

## Family North East pebble hunt

1. How many pebbles did you find? Count them!
2. Are they different sizes? Can you put them in order from smallest to biggest!
3. Now feel each pebble and put the smooth pebbles in one pile, and the rough pebbles in another. Which do you have more of, smooth or rough?
4. Which pebble is your favourite? Why?
5. Find all the flat pebbles and make a tower, placing one on top of the other.
6. Clear the pebbles from an area of sand and then make a picture with them, you could make a starfish, fish, crab or jellyfish!
