

# KEY STAGE 2 - LESSON 4: CAREERS

## INTRODUCTION

Conservation is a growing sector, which requires an enthusiastic and well trained workforce, as well an educated and well informed public with pro environmental behaviours and attitudes. Explore the various professions within the conservation sector that all work together to better our environment, and explore the skills that they need to succeed.

## TEACHING AND LEARNING

Task 1: Watch the video and run through the presentation:

- The presentation compliments the video and explores careers in conservation and the many different types of people and skills needed to protect our environment.

Task 2: Practical Activity: Match the professional with the role description:

- Print out the cards and lay on the table, as a group have the students match the professional with the accompanying role. You can take this further by reinforcing the skills needed for each role and having the learners think about what skills they have/ enjoy using.

# KEY STAGE 2 - LESSON 1: CLIMATE CHANGE

## LEARNING OUTCOMES:

- 1) Know that there are many different roles in conservation
- 2) Know that diversity is important in any profession
- 3) Know that different careers require different skills

## CURRICULUM LINKS:

### ECONOMIC WELLBEING: ASPIRATIONS, WORK AND CAREER:

- There is a broad range of different jobs/careers that people can have; that people often have more than one career/type of job during their life.
- That everyone has different strengths.
- About some of the strengths and interests someone might need to do different jobs
